TURBO LEOPARD 4 Port SuperSpeed USB3.0 Hub
Quick Installation Guide

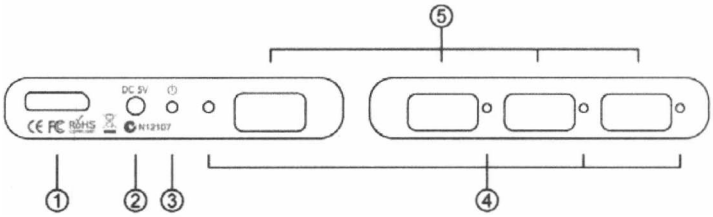
1. Getting Started

Kit Contents

- TURBO LEOPARD USB3.0 Hub
- USB3.0 Cable
- Power Adapter
- QIG

Minimum System Requirements

- Available USB3.0 Host port of your computer
- Windows XP, Vista, 7 ; Linux ; Mac OS X 10.5.8 or later



Product Overview

1. USB3.0 Port (for PC Host)
2. DC Connector
3. Power LED
4. USB Device LED
5. USB3.0 Port (for USB device)

2. Install and Uninstall the USB3.0 Hub

Step 1 : Please plug the adapter's DC jack into the DC socket and connect power adapter to a household AC outlet
Step 2 : Connect the computer and USB hub with related USB3.0 cable.
Step 3 : The system will automatically detect the USB hub and install drivers.

Note : USB3.0 Hub is driver-free under Windows, Linux and MAC OS X. After connecting the hub to USB3.0 port of the computer, system will automatically detect new hardware and install driver properly. If system can not install hub driver automatically, be sure to confirm system's USB3.0 host driver is working properly. We do suggest that you to re-install the original USB3.0 host driver.

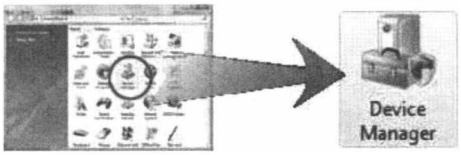
Caution : Be sure to connect USB3.0 hub to USB3.0 port on the system. USB3.0 hub will not enhance USB data transfer rate, if user connects it to traditional USB2.0 or USB1.1 port.

Step 4: To safely unplug or eject any USB device, always follow **"Safely Remove USB Device"** in the system task bar.

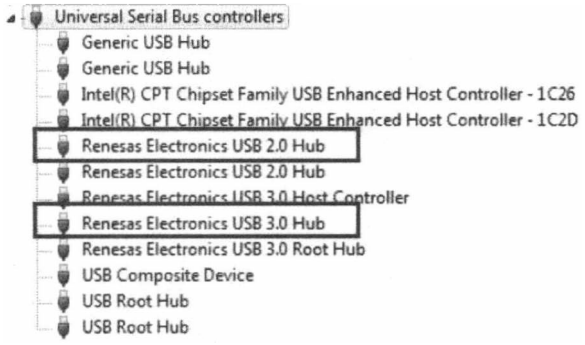
3. Hardware Verification (Windows OS)

1. Click on the **"Device Manager"** tab in the Windows Control Panel.

Start > Controller Panel > Device Manager



2. Enter **Universal Serial Bus Controllers** item, you can read **"USB2.0 Hub" & "USB3.0 Hub"** devices in the Device Manager.



Note : Be sure to connect USB3.0 Hub to USB3.0 port, if connecting it to USB2.0 or USB1.1 port, the USB3.0 Hub device will not be displayed in the "Device Manager".
